Generator Sets

Power Plants

Power Transformers

Electrical Switchgear

"We challenged PowerSafe with an extremely difficult task of helping us repower our old fleet of generator sets and gave them a very short timeline to deliver phase one of our repower program. PowerSafe was able to meet our deadline to hit our on the "rail" tourism schedule. We recommend PowerSafe for your Power Generation needs and congratulate them on a job well done."

-Rob Mensinger

Product & Applications

PowerSafe has been providing power generators and engines to every industry that has specialized power needs, whether you are an oil drilling or utility company, data center, commercial building or looking to install a cogeneration power system to decrease your carbon footprint. PowerSafe has a wide range of power generation solutions for standby, back-up, prime and continuous applications.

Industries We Serve: Oil & Gas, Hard Rock/Open Pit Mining, Aggregate, Crypto Currency / Bitcoin, Data Centers, Utilities, Film & Television, Cogeneration (CHP), Backup Power, Marine, Special Events, Government, Hospitality, Medical, etc.

Manufacturers Offered: Allison, Caterpillar (CAT), Cummins, Detroit / MTU, EMD, FG Wilson, GE Energy, Guascor, Jenbacher, Kawasaki, Kohler, Kongsberg, Magnum, MAK, MAN, Mitsubishi, MTU, Multiquip, MWM, Deutz, Onan, Perkins, Rolls-Royce, SDMO, Solar, Wartsila, and Waukesha.

Power Plants

PowerSafe specializes in working with our clients to decommission existing Power Generation assets used to power: industrial sites, mine sites and other large kW power plants. PowerSafe helps repurpose them for use with new and existing clients that require large scale power and have tight deadlines or budget constraints. PowerSafe acquires and sells all models and sizes (50kW to 4mW and above). Contact a PowerSafe sales representative to learn more about your generator / engine, current market value and how we can assist you further.

We Sell Power Generators

Contact a PowerSafe technical sales representative today to learn about available options for your power requirements based on your available budget and timeline. Whether you are looking for a 30kW back up power unit for your farm or you need a multi-megawatt natural gas power plant for your remote site, we will have a solution for you.
